Kashif's story

How our wireless broadband helped upgrade Kashif's performance at work.

Kashif, a Senior Test Analyst at Ballie Gifford, struggled with poor broadband prior to discovering WeLink. Unable to access fibre broadband at his premises and experiencing incredibly low upload and download speeds which impacted his job as he worked from home, Kashif describes the difference our lightning-fast wireless broadband made.

Life before WeLink

“The previous quality was abysmal. Max download speed was 8mbps and max upload was 2mbps, but most of the time I struggled to get even 5mbps download. After trying to convince Openreach and Virgin Media to install Fibre to our premises and getting nowhere, I was close to

giving up, when a friend sent me a news article which led me to discover WeLink”

What is the performance like with WeLink broadband?

“WeLink has honestly been revolutionary,

especially with the current situation and having to work from home. Prior to getting WeLink, I would often freeze on Zoom calls with my team which was somewhat embarrassing, especially when on calls to clients. After getting WeLink, I've not had a single frozen zoom call, and the symmetrical download

and upload speeds have blown my wildest expectations. Upload speed is insane! It's like going from driving a Ford Fiesta to a Formula 1 racing car!"

"...the symmetrical download and upload speeds have blown my wildest expectations.

Upload speed is insane! It's like going from driving a Ford Fiesta to a Formula 1 racing car!"

How was the installation process?

"The installation process was totally pain free. We

had 2 engineers come out who did everything in a single afternoon"

Would you recommend WeLink wireless broadband to others?

"I still find it fascinating that technology like this exists and yet not many people have heard of it.

If we hadn't discovered WeLink, we would still be at the mercy of the traditional broadband companies. But I'm extremely grateful that this cutting-edge technology which WeLink have has finally arrived in Edinburgh.

I whole heartedly recommend WeLink to everyone in the Edinburgh

area. It's been a complete game changer for me and I promise you this, once you try WeLink, you will not want to go back to traditional internet via the telephone socket ever again"
