Luna's story

How our wireless broadband helped Luna with important work meetings
Luna's previous broadband provided a mere 15Mbps connection, meaning conducting work meetings from home were a real challenge.

Life before WeLink

"I had a 30Mbps wireless contract with another provider (15 Mbps in practice) that was mostly ok for our needs, but it had slowed down to a trickle due to infrastructure issues. If I have to be honest, there was no other option in the 100 Mb/s plus services category. Our house and our street have no cable broadband."

What have you been able to achieve since using our service?

"No more shouting around 'stop using the internet NOW! I am starting an important work meeting!'. The connection is very stable and often exceeding the promised 100 Mb. Support was swift the only time I needed it."

If there's one word you could use to describe your experience with us, what would it be and why?

"Effective."

Would you recommend WeLink wireless broadband to others?

"It's a very good alternative to the other available wireless service for all the people in the area not having cabled broadband, and there are many streets in our same situation. It seems to work well, and the pricing is very clear."
