Morgan's story

How our wireless broadband helped Morgan enjoy cutting edge entertainment

As an avid gamer and regular consumer of 4k movies, fast download speeds and the ability to network with multiple users online are essential for Morgan.

Life before WeLink

“The internet was frustratingly slow, albeit consistent, but I needed to download 4K content overnight to be able to use the internet for other basic tasks like surfing or emailing among several users.

WeLink's service stood out as it didn't require fibre optic infrastructure and promised fast download and upload speeds.”

“
WeLink's service stood out as it didn't require fibre optic infrastructure and promised fast download and upload speeds.
”

What have you been able to achieve since using our service?

“Everything one would expect in the 21st century, multiple users on multiple platforms sharing without a hitch regardless of the heaviness of data requirements. High data requiring games of 60GB now download in approx. 20min and average HD / UHD films are ready to watch within 30 seconds.”

If there's one word you could use to describe your experience with us, what would it be and why?

“Speed. It makes all the difference.”

Would you recommend WeLink wireless broadband to others?

“Yes - both download speeds and customer

service have exceeded my expectations.

I found the team on every level from sales and marketing to operational / engineering ground staff extremely helpful and friendly and some have really gone above and beyond while we were experiencing problems. Communication has largely improved within the company as well.”
